WORKSHEET: FROM FARM

Scottish Livestock Farming

FROM FARM

Instructions: Once you've completed our From Farm PowerPoint presentation, answer the questions below.

Name:	Class:	Date:

Identify the three main types of red meat in Scotland. State the animal that they come from.		
	Meat	**Animal**
1		
2		
3		

Circle the percentage of Scottish land that is not suitable for growing crops.		
60%	70%	80%
Describe what Scotland's land is most suitable for growing instead.		

Name two different breeds of Beef Cattle:			
Circle how many calves most cows have.	1	2	3

There are around 6.54 million sheep in Scotland.			
Circle the main reason why we have so many sheep in Scotland.	Wool production	Meat production	Land management
How many lambs do most sheep have?			
Describe why sheep are shorn every year.			
Sheep live outside most of the year. State what they eat the majority of the time.			

Most pigs in Scotland are reared on specialised pig farms where biosecurity, animal health and welfare are the top priorities.			
Circle how many piglets an average sow has.	2-4	6-8	10-15
State how long a pig is pregnant for.			

Assurance Schemes are important across food systems. The red meat assurance scheme is delivered by QMS. Farmers who don't meet their high standards are not permitted to be part of the scheme.			
Circle how often an inspector visits the farm.	Every year	Every 3 years	Every 5 years

All animals are entitled to 5 freedoms. Farm inspectors and SPCA inspectors use these freedoms as the foundations for checks on farms to ensure good animal welfare and wellbeing standards.	
List as many of the freedoms as you can remember.
